A FRENCH MANUFACTURER SERVING ALL COMMUNITIES & BUSINESSES

PROCITY® is the street furniture, protection and information display brand of the SPL Group, an industrial manufacturer of wood, steel and aluminium equipment. Serving communities and businesses for 40 years, SPL employs 150 people, with four European commercial subsidiaries, an export department & headquarters in the Parisian area. We cover the full range of needs faced by developing businesses and communities.

An iconic brand for street furniture, access control and information display.

Europe's leader in safety, security and surveillance mirrors.

THE POWER OF TWO STRONG BRANDS

The SPL Group expresses its expertise through two specialised brands, each known and recognised for the quality of its products and services. Our top-quality materials, precision manufacturing and careful attention to fine details ensure that our customers receive durable and resistant products that stand the test of time.

A CAREFULLY SELECTED NETWORK OF RESELLERS AND DISTRIBUTORS

PROCITY® products are sold throughout Europe, exclusively through a network of specialised resellers and distributors. Our network is made up of professionals specialising in design and construction for public and private organisations (communes and towns, highways, public institutions, private enterprise, industrial and warehousing, public works, and more). PROCITY® resellers and distributors are true partners and there to guide you. They are selected for their professionalism and expertise, they share our values, and they are supported year round by our sales and technical teams.

THE SPL GROUP

brochure online

40 YEARS OF INSPIRATION FOR LIVING PLACES

Since 1983, SPL has been constantly evolving to meet demands of its ever-growing number of customers with an on emphasis merging technical progress and technological performance. Applying renowned industrial expertise, we are focused on the future. Driven by the strong ambition to continuously adapt our offering to the evolving uses of shared spaces. This includes meeting the challenges of changing designs and the welcome growth in acceptance of the need to protect the environment.

Success is collective. It reflects our culture of responsibility, participation, and integrity. Dedicated employees and partners contribute with rigor and enthusiasm, always aiming for excellence, made visible in the products that Procity customers depend on. Celebrating our 40th year of helping create a place for people to gather, make timeless moments and live life.

40 years devoted to customer satisfaction.

40 years of projects dedicated the public and private spaces.

10,000 products
available for varied
types of public and
private development

OUR SERVICES

AT PROCITY®, CUSTOMER SATISFACTION IS OUR TOP PRIORITY!

Products in stock

Our most popular products are kept in stock and shipped to you within a minimum of delay.

Always on time

We make it a point of pride to always deliver on time, for both standard and customised products.

Sales support and customer service

Our experienced technical sales teams are ready to advise on any technical query distributors or end clients may have on our products. Once our PROCITY® products are installed on site, our after-sales service is at your disposal for any question and will welcome any suggestions for improvements.

EXPERTISE & KNOW HOW

Our roots are in our industrial know-how. We design and manufacture PROCITY® products in the Loir-et-Cher and Sarthe regions of France.

Our three factories specialising in steel, aluminium and wood have a combined total 30,000 m² of floor space.

From design to manufacture, our teams understand the raw materials and comply with applicable standards to guarantee optimal quality.

PERFORMANCE

Each of our sites boasts industrial equipment at the cutting edge of technology. Our continual investments in the finest automation systems available (welding robots, cutting machines, etc.) mean that the products we offer meet your criteria even more precisely, offering the best possible balance of quality and price.

EXPERTISE

We have an integrated design office dedicated to designing our products. Our design and engineering teams develop innovative concepts relating to comfort and convenience as well as functionality and style. Our design office is in charge of ensuring that our products meet all technical specifications, and of the entire manufacturing process. It also contributes its expertise for all customised product requests.

QUALITY

Our quality assurance service is involved in every stage of production. They carry out rigorous and regular checks in order to offer you reliable products with impeccable quality. In addition, our experts closely follow the evolution of the regulatory framework and ensure strict compliance with the standards in force.

PROCITY® QUALITY

Choose
our products
for guaranteed
peace of mind!

PROCITY® products are essential components of the industrial and urban landscape. The environment associated with their use and your wishes of durability and value for money mean that they must be of a high standard of quality. From cutting, bending, notching, welding, gluing, grinding and sanding to corrosion proofing treatments, finishing paints and packaging; we bring the greatest possible professionalism to every step of the process in order to provide you with products of the highest quality.

OUR WARRANTIES

Anodisation	10-year warranty
Zinc-Rich Primer Powder (ZRPP)	5-year warranty ⁽¹⁾⁽²⁾
Inox	5-year warranty ⁽¹⁾⁽²⁾

Paint finish quality and UV resistance

5-year warranty

Weld strength

5 year warranty

Watertightness of exterior displays

5-year warranty

Recycled plastic slats

5-year warranty ⁽³⁾

Paint and stain finish quality and UV resistance of wooden components⁽⁴⁾

1-year warranty

Mirror guarantees

Stainless-steel	10-year warranty
Anti-frost/Anti-condensation	6-year warranty
Polycarbonate	5-year warranty
P.A.S.®	5-year warranty
Polymir®	3-year warranty
PMMA®	2-year warranty

⁽¹⁾Excluding maritime environments (within five kilometres of the seashore, roads/paths that are regularly salted in winter).
⁽²⁾Excluding polluted atmosphere (industrial zone, port, swimming pool, chemical industry, barns etc...). ⁽³⁾Excludes discolouration and deformation. ⁽⁴⁾No warranty for components made of untreated wood.

PROCITY® COMMITMENTS

IMPLEMENTATION OF THE EN 1090 STANDARD

PROCITY® implements the EN 1090 standard in its industrial process. This European standard governs the manufacture and assembly of steel and aluminium structures. It concerns some of our shelters and regulates, among other things, the materials used, the manufacturing process and more particularly the welding procedure. The application of the EN 1090 standard at PROCITY®, is the guarantee of having resistant and durable equipment. The products concerned by this standard will be easily identifiable since they will be subject to a CE marking.

EN 1090 standard
certificate

OUR ECO-RESPONSIBLE APPROACH

Sustainable development is an integral part of our thinking on economic and environmental performance. Thus, we design products that are strong and resistant to intensive use, in order to limit their frequency of renewal.

When delivering our products, we mainly use wood and cardboard, and prefer recyclable packaging.

We use environmentally friendly raw materials, such as PEFC-certified oak and recycled plastic from the treatment of industrial and household waste.

Our waste management policy implemented with our partners is active throughout our production.

PROCESSING RAW MATERIALS

STEEL

Galvanisation

This process consists of immersing products in a zinc bath at 450°C, providing each part with total protection from corrosion, both inside and out. Galvanisation is recommended for products that are subject to the heaviest use or installed in salty air or corrosive environments.

ZRPP

(Zinc Rich Primer Powder)

Primer coating enriched with zinc, for products used in a standard environment. This corrosion protection is appropriate for normal product use.

Finishing paint

We use a UV-resistant polyester powder coating. Our products may be galvanised and painted or painted over zinc primer (ZRPP) depending on local custom or environment.

Galvanisation

ZRPP

STANDARD COLOUR RANGE

For other RAL colours, please contact us.

NEW

TEXTURED COLOUR RANGE

PROCITY® has expanded its colour offer with a new “textured” paint variety. It features a granular surface texture and a subtle appearance that’s both matte and satin, greatly enhancing a product’s look.

Contact us for details.

ALUMINIUM

Anodised or painted profiles

Our aluminium profiles are anodised or painted. Anodised profiles features an electrochemical corrosion-proofing treatment that guarantees better resistance to heat, wear and corrosion. Painted profiles are covered with a 60µ layer of powder coating, baked at 180-200°C for maximum resistance. The aluminium is stored indoors throughout the entire manufacturing process to avoid any oxidation.

Powder coating

Anodisation

NOTICE BOARD COLOUR RANGE

STAINLESS STEEL

Brushed finish 304 stainless steel

Stainless steel, also called Inox, is a corrosion-resistant steel alloy: the addition of chromium and nickel in the matrix of a steel forms a film of chromium oxide which protects the metal against rust. Our 304 stainless steel products can be used indoors and outdoors, without altering their original appearance over time, especially after contact with UV rays. For maintenance, it is essential not to use bleach products or chlorinated derivatives which risk causing corrosion.

304 Stainless steel

FINISH

TIMBER

Wood varieties

We work primarily with three varieties of wood:

- PEFC-certified oak, a noble wood variety that is sourced from forests in France and 100% recyclable.
- Exotic hardwood.
- Conifers.

Finishes

Our wood planks are air-dried, then undergo a water-based impregnation stain treatment to protect and strengthen the wood. We then apply either a coat of light oak or mahogany colour finish stain or a coat of gloss paint, both of which are weather and UV-resistant. We recommend regular upkeep to maintain this protection.

Stained wood

Painted wood

WOOD STAIN FINISH

Light oak stain

Mahogany stain

RECYCLED PLASTIC

Brown slats, structured appearance

The slats we use are made of high-quality recycled plastic, consisting of secondary plastics, mainly polyolefin mixtures. These are made from old plastic packaging from recycled household and industrial waste collections.

For better resistance to use, our seat slats are reinforced with a galvanized steel frame of 25 x 6 mm.

LISBON RAILING

A true classic in urban design: a diagonal cross for an eye-catching look and an exceptionally comfortable top handrail which extends slightly past the edges of the frame to provide a perfect continuous line when installed.

Two lengths: 1000 or 1500 mm.

Three frame styles: simple cross, rosette or mesh.

Above-ground height: 1000 mm.

Posts: steel tubes 35 x 35 mm.

Finish: zinc primed and painted in our colours (see page 10).

Installation: concreted directly into ground (base plates available as option).

Can be made removable with the Lockblock® socket system for removable railings, see p. 24.

HERITAGE RAILING

With a solid-steel handrail and in versions with or without end grips, with or without a rosette, used alone or in a continuous run, this railing offers a wide range of installation options.

Two lengths: 800 or 1500 mm.

Two frame styles: simple cross or rosette.

Three handrails: no end grip, single end grip or double end grip.

Height above ground: 1000 mm.

Posts: steel tubes 35 x 35 mm.

Finish: zinc primed and painted in our colours (see page 10).

Installation: concreted directly into ground (base plates available as option).

Can be made removable with the Lockblock® socket system for removable railings, see p. 24.

VENICE COLLECTION

VENICE RAILING

A railing for the cities of tomorrow that coordinates perfectly with other products from the Venice collection. Designed to enhance, protect and provide a strong identity for your public spaces.

Two lengths: 1000 or 1500 mm.

Three frame styles: simple cross, 3 mm thick laser cut metal panel or bars.

Height above ground: 900 mm.

Posts: steel tubes 50 x 30 mm.

Finish: zinc primed and painted in our colours (see page 10).

Installation: concreted directly into ground (base plates available as option).

Can be made removable with the Lockblock® socket system for removable railings, see p. 24.

LOCKBLOCK® SOCKET SYSTEM FOR REMOVABLE RAILINGS

Any PROCITY® railing can become removable with these kits, each featuring two sockets including one that locks with a triangle key. A fixed central flush boss ensures there is no trip hazard to pedestrians when the railing is removed. The railings drop 180 mm into the sockets to ensure a constant height for all street furniture installed.

“Concrete effect”: The railing remains perfectly stable once placed into the sockets.

Self-draining through gravel at bottom of sockets.

Reservoir allows for the accumulation of sand and dirt.

Locks and unlocks with 11 mm key and screw bolt.

The lock is protected by a black lacquered flap.

Finish: galvanised steel for complete corrosion protection.

Kit for “Lisbon” and “Heritage”	203400
Kit for “Venice”	203405
Kit for “Province”, “Trio”, “Linea” and “Dome top”	203404
Kit for “Diamond”	203403

DOME TOP STEEL BOLLARD

The simplicity of our most popular steel bollard lets it blend into any environment.

Steel tube: ø 60, 76, 90, 114 or 168 mm.

Tube thickness: 3mm with a welded domed plug.

Finish: galvanised and painted or zinc primed and painted in our colours (see p. 10).

Installation: concreted directly into ground (concrete depth 180 mm).

Can be made removable with Lockblock® 21 (except ø 60 mm or ø 168 mm), see page 31.

LOCKBLOCK® 21 SYSTEM FOR REMOVABLE STEEL BOLLARDS

Removable-bollard system for \varnothing 76, 90, 102 and 114 mm steel bollards.

Depth to which bollards extend into the socket: 180 mm.

Self-draining: through gravel at bottom of sockets.

Easy maintenance: reservoir allows for accumulation of sand and dirt, disassembles for complete maintenance.

Finish: galvanised, with stainless-steel mechanism for complete protection from corrosion. After installation, visible parts are lacquered in black.

Installation: orientation indicator for chain posts.

TO UNLOCK:

Unlocks with 11 mm triangle key and by turning the bollard. Stand upright to remove bollard.

TO LOCK:

Simply turn the bollard, no need to bend down.

Unlocking

For safety, the exposed slots for our removable bollard kits are smaller than 2 cm.

LOCKABLE SOCKET FOR REMOVABLE BOLLARDS

Lockable socket for removable steel bollards in \varnothing 60, \varnothing 76, \varnothing 90 and \varnothing 102 mm sizes.

Self-draining: through gravel at bottom of sockets.

“Concrete effect”: the bollard remains perfectly stable once it is in place.

Reservoir allows for the accumulation of sand and dirt.

Finish: galvanised steel for complete corrosion protection.

Locks and unlocks: with 11 mm key and screw bolt.

The lock is protected by a black lacquered flap.

SOLIBLOC® FOLD DOWN BOLLARDS

These heavy-duty fold-down bollards are held solidly in place when anchored in their base, providing market-leading robust access control. A simple and effective locking system using a 14 mm triangle key ensures that the bollard remains completely rigid in the upright position. In the lowered position, the lock mechanism is automatically covered to prevent accumulation of gravel or leaves.

Steel tube: ø 76 mm.

Choice of 5 models: City, Agora, Sphere, brushed stainless steel or Dome top.

Top cap: cast steel, die-cast aluminium or stainless steel.

Finish: galvanised and painted in our colours (see p. 10).

Lock mechanism galvanised and painted black RAL 9005.

Installation: concreted directly in the ground using fixing rods (supplied).

RETRACTABLE BOLLARDS

Its new design is more robust thanks to its reinforced guidance system.

A choice of two bollards for frequent or quick access to protected or restricted areas.

Finish: zinc primed and painted in our colours (see page 10).

Installation: concreted directly into ground.

Lock mechanism

Automatic and self-locking system made in stainless steel, standard lock uses 11 mm triangle key.

Ground-cover

Steel, ø 460 mm in 10 mm gauge, galvanised and lacquered in black. Non-slip texture.

Sliding mechanism

The bollard is equipped and maintained by centre and side guide rails. Powered by a sealed gas piston, the bollard slides vertically within the chamber.

Casing

Casing is made of galvanised steel tube with lift eyelets for quick and easy installation.

Dimensions: 1030 mm high x 545 mm wide.

ALLOWING VEHICLE PASSAGE:

1. Turn and remove the key.
2. Apply vertical pressure on the bollard until it automatically locks in the lowered position.

BLOCKING VEHICLE PASSAGE:

Turn the key, and the bollard rises up and self-locks in the raised position.

Our bollards are delivered with installation and maintenance instructions that must be followed precisely to ensure proper functioning.

The access control plan must not allow any situation in which vehicles can drive over retractable bollards.

The bollard must not be subjected to any impact. This product is intended only to control vehicle access and is not an anti-ram bollard and should not be used as such.

ANTI-RAM DETERRENT BOLLARD

Used to deter and protect sensitive areas (shops, train stations, pedestrian areas, and more) from “ram-raid” attacks. Designed to be filled with poured concrete and rebar during the installation process in order to increase its impact resistance.

Total height: 1238 mm (ø 160 mm), 1264 mm (ø 219 mm), or 1270 mm (ø 273 mm) or 1180 mm (all brushed stainless steel model).

Recommended above-ground height: 800 mm.

Steel gauge: 4 mm or 2 mm for all brushed stainless steel model.

3 versions available: with steel top, with brushed stainless steel top (for ø 160 and 219 mm) or all brushed stainless steel.

Finish: galvanised steel or zinc primed and finished in our colours (see p. 10) or brushed stainless steel.

ROUND POLYCARBONATE SOLAR ROAD STUDS

A road stud with an attractive design, equipped with 3 flashing LEDs on each side. Completely self-powered, to clearly highlight locations where accidents are more likely.

Dimensions: ø 116 mm x 25 mm high.

Polycarbonate road stud: attach to ground with epoxy glue and screws (not included).

Features: 3 flashing LEDs on each side.

Choice of 2 LED colours: white or blue.

Self-powered: a fully-charged road stud has enough power for over 72 hours of operation (full charge requires 8 hours of exposure to daylight). Waterproof (IP68), visible from over 500 metres away, and can withstand pressure up to 10 tonnes.

All road studs must be used and installed in accordance with local highway legislation and safety requirements.

ALUMINIUM SHELL SOLAR ROAD STUDS

These high-quality road studs consist of an indivisible aluminium shell and a solar stud made of polycarbonate. Three flashing LEDs on each side provide total visibility for the area to be protected.

Dimensions: ø 126 mm x 60 mm high.

Installation: stud embedded after core drilling.

Features: 3 flashing LEDs on both sides.

Choice of 2 LED colours: white or blue.

Self-powered: a fully-charged road stud has enough power for over 72 hours of operation (full charge requires 12 hours of exposure to daylight).

Waterproof (IP68), visible from over 500 metres away, and can withstand 20 tonnes of pressure.

All road studs must be used and installed in accordance with local highway legislation and safety requirements.

TRAFFIC MIRRORS WITH RED AND WHITE FRAME

Our traffic mirrors provide maximum visibility at strategic locations in the urban environment, such as dangerous crossroads and intersections, in order to reduce the risk of accidents.

Frame: thermoplastic resin, anti-UV treated and tested to prevent cracking and yellowing. High-quality, durable red reflective adhesive stripes. The frames of our ø 800 and 900 mm Polymir®/P.A.S.® mirrors are made of ABS/PMMA.

Installation: our Polymir® and P.A.S.® mirrors are delivered with galvanised-steel fixing kits for walls, round posts (ø 60 to 90 mm) and rectangular posts (60 x 80 mm or 80 x 80 mm), allowing for precise adjustment of mirror position. This fixing kit has been tested and certified for wind resistance up to 183 km/h.

Polymir® Quality: the Polymir® mirror surface reflects a clear image with no distortion. It is unbreakable, impact-resistant, and has an anti-UV surface treatment. Supplied with a 3 year warranty.

P.A.S.® Quality: the P.A.S.® mirror surface features Polymir® quality plus anti-scratch and an anti-static treatment to guarantee your satisfaction for an additional 2 years.

Accessories: Heated film for defrosting/defogging. Posts available for all outdoor mirrors.

TRAFFIC MIRRORS WITH RED AND WHITE FRAME IN STAINLESS STEEL AND ANTI-FROST/ANTI-CONDENSATION

Stainless-steel VIALUX® traffic mirrors are designed to stand up to even the toughest conditions: salty air environments, high altitudes, chemical pollution and more. The anti-frost/anti-condensation versions of these mirrors, developed by VIALUX®, do not require an electrical connection.

Stainless Steel Quality: the unbreakable, UV-resistant stainless-steel mirror surface ensures a long life span, with a precision polish for unparalleled image quality.

Stainless Steel & anti-frost/anti-condensation Quality: the stainless-steel mirror is equipped with an exclusive defogging and defrosting system requiring no electrical wiring.

The mirror equipped with a system which **requires exposure to the sun**, its operation will not be optimal if it is installed against a wall or if it is constantly in a shaded area.

Installation: delivered with galvanised steel fixing kit for walls, round posts (ø 76 to 90 mm) and rectangular posts (60 x 80 mm or 80 x 80 mm). Important: our Stainless Steel mirrors may only be installed on steel posts.

Frame: the expanded PVC frame is anti-UV treated and tested to prevent cracking and yellowing. High-quality, durable red reflective adhesive stripes.

Accessories: posts available for all outdoor mirrors.

ANTI-FROST/ANTI-CONDENSATION / 2-in-1 Functionality

The anti-condensation function of our VIALUX® mirrors prevents water droplets from forming, regardless of temperature and humidity conditions where the mirror is installed. The anti-frost function of our VIALUX® mirrors allows a frost free image in temperatures as low as -20°C. The mirror function uses latent heat stored during the day to prevent frost and mist from forming.

CONVIVIALE® BICYCLE RACK

The angled parking design significantly reduces the space this bike rack takes up on pedestrian walkways and keeps handlebars from getting tangled.

Models: 3 spaces, single sided. Hoops can be added for a double-sided configuration.

Extension: 3-space extension module, single sided.

Structure: steel tube 70 x 70 mm and 40 x 40 mm frame, hoops ø 22 mm.

Finish: galvanised and painted in our colours (see page 10).

Installation: on base plates.

TRADITION NOTICE BOARDS DEPTH 30 MM

This slim, compact and elegant notice board provides lasting protection for documents displayed outdoors.

Technical characteristics - notice board

Display: single sided.

Display area: from 2 to 18 A4.

Glazing: 4 mm Plexichoc®.

Opening system: side opening reversible or double side opening dual door.

Closure: tamper-proof safety lock with 2 keys. The dual door versions are also available locking on one side and a non-locking latch on the other for public access.

Waterproofing: elastomer seal.

Interior finish: galvanised steel sheet lacquered in white on interior back panel, light grey on the exterior back panel.

Frame finish: silver anodised aluminium, or painted in our notice board colour range (see page 10).

Installation: to wall or on posts.

Version with "INFORMATION" header inside: adhesive header strip, H60 mm (for notice boards 4 A4) or H100 mm, factory fitted.

Procity® magnets: included (1 per A4).

Post mounting options

Post kit: Two 60 x 40 mm aluminium posts either silver anodised or painted, delivered with 4 brushed stainless steel attachment brackets. Installation by concreted directly into ground or on base plates.

Additional post: One 60 x 40 mm post delivered with 2 brushed stainless steel central attachment brackets to connect multiple display cases. Concreted directly into ground only.

Header panel options

Header panel: 2 mm steel sheet.

2 shapes: Dome or Rectangle.

Installation: bolts or screws not included. Attached to a wall using pre-drilled mounting holes or on posts using bolts supplied with the post kit.

Sign-writing: not supplied.

Other options

LED lighting kit: high efficiency white light typical brightness 120 Lumens per watt, LED IP20, transformers IP67, life expectancy 75000 hours, energy efficiency of 12.5 watts per linear metre. (Warning: LED ribbons & transformer are not factory fitted and require installation by a qualified electrician to comply with applicable safety regulations).

"1000" NOTICE BOARD DEPTH 75 MM

A timeless and dignified notice board with a wide variety of available formats and accessories to support every possible combination.

Technical characteristics - notice board

Display: single sided.

Display area: from 8 to 30 A4.

Glazing: 4 mm Plexiglas® or safety glass.

Opening system: side opening reversible door, dual door or raising door on gas struts.

Closure: tamper-proof safety lock with 2 keys. 2 locks on 1350 mm high side opening door model and all raising door models. The dual door versions are also available locking on one side and a non-locking latch on the other for public access, contact us.

Waterproofing: elastomer seal.

Interior finish: galvanised steel sheet lacquered in white on interior back panel, light grey on the exterior back panel.

Frame finish: silver anodised aluminium, or painted in our notice board colour range (see page 10).

Installation: to wall or on posts.

Procity® magnets: included (1 per A4, limit of 20 per display case).

Post mounting options

Round ø 76 mm post kit: 2 round ø 76 mm posts in silver anodised aluminium or painted with black lacquered steel top. Delivered with 4 dove tailed cast aluminium clamps for easy and rapid assembly without drilling. Adjustable notice board height. Concreted directly into ground only.

Quatro post kit: 2 oblong posts with 80 x 125 mm cross section, in silver anodised aluminium or painted with black lacquered steel top. Delivered with 4 dove tailed cast aluminium clamps for easy and rapid assembly without drilling. Adjustable notice board height. Install by concreting directly into ground or on base plates (mounting brackets included).

Additional Quatro post kit: 1 oblong post 80 x 125 mm with 4 connectors. In case of substantial wind exposure, installation by concreting into ground is strongly recommended.

Optional header board

Frame: 75 mm aluminium frame, right-angle corners.

Surface: galvanised steel sheet with white lacquer.

Height: 220 mm.

Installation: delivered with 2 clamps and bolts.

Finish: silver anodised aluminium, or painted in our notice board colour range (see page 10).

Sign-writing: not supplied.

Other options

LED lighting kit: high efficiency white light typical brightness 120 Lumens per watt, LED IP20, transformers IP67, life expectancy 75000 hours, energy efficiency of 12.5 watts per linear metre. (Warning: LED ribbons & transformer are not factory fitted and require installation by a qualified electrician to comply with applicable safety regulations).

"2000" NOTICE BOARD DEPTH 75 MM

An imposing elegant notice board with a contemporary rounded corner design. Its multiple configuration options make it totally adaptable.

Technical characteristics - notice board

Display: Single sided or double sided.

Display area: from 9 to 30 A4.

Glazing: 4 mm Plexichoc® or safety glass.

Opening system: reversible side opening door or raising door mounted on gas struts.

Closure: tamper-proof safety lock with 2 keys. 2 locks on 1350 mm high side opening door model and all raising door models.

Waterproofing: elastomer seal.

Interior finish: galvanised steel sheet lacquered in white on interior back panel, light grey on the exterior back panel.

Frame finish: silver anodised aluminium, or painted in our notice board colour range (see page 10).

Installation: to wall or on posts.

Procity® magnets: included (1 per A4, limit of 20 per display case).

Post mounting options

Round ø 76 mm post kit: 2 round ø 76 mm posts in silver anodised aluminium or painted with black lacquered steel top. Delivered with 4 dove tailed cast aluminium clamps for easy and rapid assembly without drilling. Adjustable notice board height. Concreted directly into ground only.

Quatro post kit: 2 oblong posts with 80 x 125 mm cross section, in silver anodised aluminium or painted with black lacquered steel top. Delivered with 4 dove tailed cast aluminium clamps for easy and rapid assembly without drilling. Adjustable notice board height. Installation: concreting directly into ground or on base plates (mounting brackets included).

Additional Quatro post kit: 1 oblong post 80 x 125 mm with 4 connectors. In case of substantial wind exposure, installation by concreting into ground is strongly recommended.

Optional header board

Frame: aluminium frame 75 mm deep, rounded corners.

Surface: galvanised steel sheet with white lacquer.

Height: 220 mm.

Installation: delivered with 2 clamps and bolts.

Finish: silver anodised aluminium, or painted in our notice board colour range (see page 10).

Sign-writing: not supplied.

Other options

LED lighting kit: high efficiency white light typical brightness 120 Lumens per watt, LED IP20, transformers IP67, life expectancy 75000 hours, energy efficiency of 12.5 watts per linear metre. (Warning: LED ribbons & transformer are not factory fitted and require installation by a qualified electrician to comply with applicable safety regulations).

For non-standard sizes and colours please contact us.

PROVINCE COLLECTION

POSTER DISPLAY CASE DEPTH 75 MM

Where street furniture and notice boards crossover. The Province poster display case is the perfect choice for communities to communicate with residents and remains coordinated with other items in the collection.

Display: Single sided or double sided.

Display area: from 12 to 24 A4.

Glazing: 4 mm Plexichoc® (safety glass for the H 1600 x 1200 mm display case).

Frame: 75 mm aluminium, rounded die-cast aluminium corners, back panel made of galvanised sheet steel lacquered white inside and light grey on the external back.

Opening system: side opening door (H 1200 x 800 mm model only) or raising door mounted on gas struts; tool-free replacement in case of major vandalism with no need to remove the display case. Integrated wear-resistant hinge, 2 safety locks with 2 keys and waterproof elastomer seal.

Height above ground: 2500 or 2700 mm with header board.

Posts: steel, Ø 76 mm.

Choose from four top caps: City, Agora, Sphere or brushed stainless steel.

Attachments: die-cast aluminium collars to allow for extensions and 90° configurations.

Decorative base cover: die-cast aluminium.

Header board: 75 mm thick. Attached to the posts with two collars. It increases post height by 200 mm. Sign-writing not supplied.

Finish: Single colour or two colours (collars, bases, display case corners, title strip corners and top caps in a different colour than the display case) see our standard colours (page 10).

Installation: concreted directly into ground.

PROVINCE COLLECTION

SIGNAGE SUPPORT

With its galvanised sheet metal panels, the Province signage support offers an excellent solution for general information signage and posters. Your distributor or local signage company will assist with all signage supplies and installation.

Display: double sided.

Display area: from 16 to 24 A4.

Blank panels: two galvanised sheet metal panels with expanded polystyrene between them.

Frame: 75 mm aluminium, rounded die-cast aluminium corners.

Height above ground: 2500 or 2700 mm with header board.

Posts: steel Ø 76 mm.

Choose from four top caps: City, Agora, Sphere or brushed stainless steel.

Attachment: die-cast aluminium collars to allow for extensions and 90° configurations.

Decorative base cover: die-cast aluminium.

Blank header board: 75 mm thick. Attached to the posts with two collars. It increases post height by 200 mm. Sign-writing not supplied.

Finish: single colour or two colours (collars, bases, panel corners and top caps in a different colour than the display case) see our standard colours (page 10).

Installation: concreted directly into ground.

KUBE. COLLECTION

KUBE. PLANTER

The Kube[®] planter is available in a variety of finishes: all steel (single-colour or two-colour) or steel and wood (light oak or mahogany stain finish). On its own or in combination with other products from the Kube[®] collection, it will blend in perfectly with any indoor or outdoor space.

Dimensions: W450 x L450 x H450 mm.

Interior finish: steel liner included.

Installation: with anchor rods (not included).

STEEL AND WOOD VERSION

Outer decoration: 6 mm solid steel and two sides made of exotic hardwood, thickness 22 mm.

Finish: steel, zinc-primed and painted in our colours (see page 10) and stained wood, light oak or mahogany finish.

ALL-STEEL VERSION

Outer decoration: 6 mm solid steel.

Finish: steel, zinc-primed and painted in our colours (see page 10), single-colour or two-colour.

Steel and wood	306422
All steel	306420

■ Code 306422

OLBIA PLANTER

This planter's simple design fits perfectly in both classic and contemporary settings.

Frame: galvanised steel tube.

Decoration: galvanised steel sheet, 2 mm gauge for 785 x 785 mm and 995 x 995 mm planters, 2.5 mm gauge for 1170 x 1170 mm planter, galvanised and painted in our colours (see page 10).

Available in 2 interior finishes: galvanised steel sheet surface or removable liner with inserts for use with lifting rings (included) for easy handling and removal.

Installation: surface mounted on adjustable feet.

Delivered assembled.

Option: water reservoir using geotextile, volcanic beads and aeration tube (not compatible with galvanised steel sheet interior).

Dimensions: W x L x H	Inner liner		Option

UNIVERSAL SWIVEL HEIGHT RESTRICTOR

Our selective swivel height restrictor lets you manage access to parking areas by lorries, caravans, etc. Mounted on a cylindrical shaft with rotation handles and stops to hold the height restrictor in closed position or open position at a 90° angle. We offer a pre-installation kit separate from the height restrictor itself so that you can prepare your concrete surfaces in advance.

Access height: from 1.9 to 4 m.

Width: from 5 to 12 m.

Structure: steel tubes, 120 x 120 mm and 80 x 80 mm. Equipped with single or double tension cable.

Locking: with stainless steel pins. Pin locked with padlock (included) or 11 mm triangle-key lock (factory fitted).

Finish: lacquered in white over galvanised steel with red reflective strips (contact us for other colour options such as yellow and black).

Installation: on base plates with stencil and ground hooks included in the pre-installation kit.

Levelling: with locknuts placed under the base plates.

Optional: height gauge rail (see page 152).

HALF-WIDTH SWIVEL HEIGHT RESTRICTOR

An access control solution for roadways that are too narrow for a full-width height restrictor.

Access height: from 1.9 to 4 m.

Width: from 2.5 to 6 m.

Structure: steel tubes 120 x 120 mm and 80 x 80 mm.

Equipped with single or double tension cables.

Locking: with stainless steel pins. Pin locked with padlock (included) or optional 11 mm triangle-key lock.

Finish: lacquered in white over galvanised steel with red reflective strips (contact us for other colour options such as yellow and black).

Installation: on base plates with stencil and ground hooks included in the pre-installation kit.

Levelling: with locknuts placed under the base plates.

Optional: height gauge rail (see page 152).

Universal height restrictors easily adjust to road widths and the specific height required.

SIGN ATTACHMENT KIT

Attachment kit for \varnothing 450 mm sign available for all of our height restrictors (sign not included).

Mounting post: 80 x 40 mm.

Code 202321

ECO SWIVEL HEIGHT RESTRICTOR

Swivel height restrictor made of steel, with swivelling top crossbar on one of the two uprights.

Above-ground height: 2200 mm.

Width: 5000 mm.

Structure: steel tubes, 80 x 80 mm.

Locking: with padlock (included).

Finish: galvanised steel supplied with reflective kit -8 red reflective strips to be applied.

Installation: concreted directly into ground.

Code 202306

HEIGHT RESTRICTOR RAIL

Length: 1500 mm.

Structure: steel tube, \varnothing 50 mm.

Finish: lacquered white over galvanised steel with red reflective strips.

Installation: 500 mm chain and rings, compatible with all height restrictors.

Code 202601

UNIVERSAL FIXED HEIGHT RESTRICTOR

The centre crossbar slides between the two horizontal bars so that the height restrictor's width fits the installation location right down to the centimetre. With our adjustable-height version, setting the desired height is simple. We offer a pre-installation kit separate from the height restrictor itself so that you can prepare your concrete surfaces in advance.

Height above ground: from 2.2 to 4.5 m.

Structure: steel tubes, 80 x 80 mm or 120 x 120 mm.

Finish: lacquered in white over galvanised steel with red reflective strips (contact us for other colour options such as yellow and black).

Installation: on base plates with stencil and ground hooks included in the pre-installation kit.

Optional: height gauge rail (see page 152).

UNIVERSAL SWIVEL BARRIER

This telescopic barrier adjusts to all road widths, from 3 to 4.75 metres. We offer a pre-installation kit separate from the barrier itself so that you can prepare your concrete surfaces in advance.

Structure: steel tubes, 70 x 40 mm and 60 x 30 mm.

Width: adjustable from 3000 to 4750 mm, locked with screws.

Locking: with padlock (included). Second post included for locking in open position.

Finish: lacquered white over galvanised steel with red reflective strips (contact us for other colour options such as yellow and black).

Installation: on base plates with mounting brackets (included).

Universal Swivel Barrier	203192
Pre-installation kit	202613

EXTRA-LONG SWIVEL BARRIER

This extra-long barrier is equipped with a wheeled support post that limits the load on the cantilevered crossbar and makes it easier to handle.

Structure: galvanised steel tubes.

Width: 6, 7 or 8 m.

Locking: with pin and padlock on tip support.

Finish: lacquered white over galvanised steel with red reflective strips (contact us for other colour options such as yellow and black).

	Barrier

Pre-installation kit	202614

EXTRA-LONG UNIVERSAL SWIVEL BARRIER

An extra long swivel barrier with tension cables for the most restrictive locations.

Structure: steel tubes, 120 x 120 mm and 80 x 80 mm.

Width: adjustable from 6050 to 10000 mm, locked with screws. (Distance between the axis of rotation and the end of the barrier.)

Height: 1.1 m

Locking: with padlock (included). Second post included for locking in open position.

Finish: lacquered white over galvanised steel with red reflective strips (contact us for other colour options such as yellow and black).

Installation: on base plates with stencil and ground hooks included in the pre-installation kit.

Code	602992
------	--------

UNIVERSAL ALUMINIUM BOOM BARRIER

Perfect for filtering vehicle traffic. The telescopic barrier adjusts to all road widths (from 3.05 to 6.40 m) – right down to the centimetre.

Structure: 80 x 80 mm aluminium bar extended with 70 x 70 mm aluminium bar.

Width: adjusts from 3200 to 6500 mm (distance between the axis of rotation and the end of the barrier) for a post-to-post width of 3050 to 6400 mm.

Opening system: rotation on stainless-steel axis on ball bearings. Counterweight must be integrated into a box attached to one end of the bar.

Locking: in raised position (on main post) or lowered position (on tip support post) with pin and padlock, included. Delivered with tip support post (steel).

Finish: painted white with red reflective strips (contact us for other colour options such as yellow and black).

Installation: on base plates with mounting hardware included.

Code 202170

Universal Barrier Crossbar: slides to adapt the barrier's width to the installation site.

UNIVERSAL BOOM BARRIER WITH GAS CYLINDER SYSTEM

The gas cylinder system allows easy opening and closing. Without any protruding counterweight, it can be positioned close to a wall. In addition, the pendulum support arm grips the ground and ensures stability.

Structure: 80 x 80 mm aluminium tube extended by a 70 x 70 mm aluminium tube.

Width: adjusts from 3000 to 4000 mm (distance between axis of rotation and the tip of the barrier).

Operating mechanism: integrated gas cylinder to compensate the weight of the boom and facilitate its use. Rotation on a stainless-steel axel. Automatic locking.

Locking options: key padlock or triangle key padlock. Height adjustable pendulum support arm (+/- 100 mm).

Finish: lacquered white steel with red reflective strips. Pendulum support arm finished in RAL 3020.

Installation: on base plates with stencil and ground hooks included.

STAINLESS STEEL MULTI-PURPOSE
MIRRORS & ANTI-FROST/CONDENSATION

Multi-use VIALUX® stainless steel mirrors adapt to any indoor and outdoor environment off of public roadways. These stainless steel mirrors are designed to withstand even the toughest conditions. The frostproof/fogproof versions of these mirrors, developed by VIALUX®, do not require an electrical connection.

Installation: galvanised steel brackets for walls, round posts (ø 76 to 90 mm) and rectangular posts (60 x 80 mm or 80 x 80 mm). Important: Our Anti-frost Stainless Steel mirrors may only be installed on steel posts.

Black gasket: mirrors are surrounded by a PVC gasket with a metal frame that resists tough outdoor conditions.

Stainless Steel Quality: the unbreakable, UV-resistant stainless-steel mirror surface ensures a long life span, with a precision polish for unparalleled image quality.

Stainless Steel & anti-frost/anti-condensation Quality: the stainless-steel mirror surface is equipped with an exclusive defogging and defrosting system that requires no electrical wiring.

The mirror equipped with a system which **requires exposure to the sun**, its operation will not be optimal if it is installed against a wall or if it is constantly in a shaded area.

Accessories: posts available for all models. Contact us.

ANTI-FROST/ANTI-CONDENSATION / 2-in-1 functionality
The fogproofing function of our VIALUX® mirrors prevents fog from forming, regardless of temperature and humidity conditions where the mirror is installed. The frost-proofing function of our VIALUX® mirrors can withstand temperatures as low as -20°C. The mirror releases latent heat stored during the day to keep mirrors free of frost and condensation.

Dimensions: L600 x W600 mm.

Two heights: 600 or 1200 mm.

Steel tube: ø 76 mm, 3 mm thick.

Finish: zinc primed and painted in RAL 1021 and black pre-applied stickers.

Installation: on base plates.

Height 600 mm	213010
Height 1200 mm	213011

RACKING IMPACT GUARDS

Install indoors to protect racking or sensitive machinery from forklift collisions. Its height and eye-catching markings improve visibility and prevent damage to fixed structures.

Dimensions: L160 mm x W160 mm.

Three heights: 400, 800 or 1200 mm.

Structure: 6 mm steel sheet (5 mm for the 400 mm height).

Finish: zinc primed and painted in RAL 1021.

Markings: black pre-applied stickers.

Installation: on base plates.

Height 400 mm	213202
Height 800 mm	213206
Height 1200 mm	213210

■ Code 213210

RUBBER WALL-MOUNTED GUARDS

Solid recycled rubber construction to protect loading areas and prevent damage to vehicles.

Dimensions: L500 x W150 x H100 mm.

Finish: solid black rubber.

Installation: with 4 bolts (not included), vertically or horizontally as needed.

Rubber wall-mounted guard (sold in batches of 10 units)	111812
Optional expansion bolts (pack of 20 units)	111566

CRASH PROTECTION BOLLARDS

A sturdy solution to protect any type of structure or to identify pedestrian zones.

Three diameters: 90, 114 or 168 mm.

Height: 1000 mm.

Steel tube: 3 mm gauge with a welded dome top.

Finish: galvanised steel or zinc primed and painted RAL 1021 (or our standard RAL colours page 10) with black pre-applied bands.

Installation: on base plate.

Optional: can be concreted directly into ground (contact us).

INDUSTRY MIRRORS
WITH YELLOW AND BLACK FRAMES

VIALUX® mirrors with yellow and black frames provide increased traffic safety within industrial sites, with easily-identifiable colours and non-reflective bands to avoid glare.

- Frame:** high-quality, durable thermoplastic resin frame and adhesive stripes.
- Installation:** galvanised steel fixing kit for walls, round posts (ø 60 to 90 mm) and rectangular posts (60 x 80 mm or 80 x 80 mm), allowing for precise adjustment of mirror position.
- Polymir® Quality:** the Polymir® mirror surface reflects a clear image with no distortion. It is unbreakable, impact-resistant, and has an anti-UV surface treatment. Supplied with a 3 year warranty.
- P.A.S.® Quality:** the P.A.S.® mirror surface features Polymir® quality plus anti-scratch and an anti-static treatment to guarantee your satisfaction for an additional 2 years.
- Accessories:** Heated film for defrosting/defogging. Posts available for all outdoor mirrors.

TRAFFIC MIRRORS STAINLESS STEEL, ANTI-FROST & ANTI-CONDENSATION MIRRORS

Our mirrors with red and white frames provide increased traffic safety outside of warehouses and industrial sites. They are designed to stand up to even the toughest conditions: salty-air environments, high altitudes, chemical pollution, and more. The anti-frost/anti-condensation VIALUX® mirrors do not require an electrical connection.

Frame: the expanded PVC frame is anti-UV treated and tested to prevent cracking and yellowing. High-quality, durable red reflective adhesive stripes.

Installation: delivered with galvanised steel fixing kit for walls, round posts (ø 76 to 90 mm) and rectangular posts (60 x 80 mm or 80 x 80 mm).

Installation: if post installation is required, the posts used must only be in steel.

Stainless Steel Quality: the unbreakable, UV-resistant stainless-steel mirror surface ensures a long life span, with a precision polish for unparalleled image quality.

Stainless Steel & anti-frost/anti-condensation Quality: the stainless-steel mirror is equipped with an exclusive defogging and defrosting system requiring no electrical wiring.

The mirror equipped with a system which **requires exposure to the sun**, its operation will not be optimal if it is installed against a wall or if it is constantly in a shaded area.

Accessories: posts available for all outdoor mirrors.
